

I am concerned about the attempts of the NAB to stifle the growth of satellite radio. I hope that their attempts to influence you on this matter will not be successful. We are paying customers of their service and should be allowed to receive any type of broadcast. I have a local cable station in Chicago that covers Chicago news and never heard of any attempts of the NAB to suppress them. Don't let these self serving interests restrict the benefits offered by this new technology.

Thank you,

Christopher K. Kesling, DDS, MS
